[Chaco Period] Terena
[Post-Chaco Period]

in want owing to illness or misfortune. Livestock, slaves, houses, and cultivated lands were the only forms of property that were actually inherited. The practice of burning a dead person's private property, consisting of clothing, tools, weapons, and ceremonial objects, over the person's grave solved the problem of their disposal. Even the houses were sometimes burnt, although the general practice was to change the doorway so that the ghost of the deceased could not find its way back.

ORGANIZATION OF LABOR

It appears, from what the Terena say, that the household was the primary economic unit. Both the men and women of the household, with whatever slaves they might have possessed, participated in agricultural labor. The men performed the heavy work of clearing and hoeing the ground, while the women and older children assisted in planting, weeding, and harvesting. The preparation of food, cooking, spinning and weaving, and pottery making were the activities of the women. Men's work consisted of hunting, fishing, tool making, preparation of skins, basket making, and warfare. Both sexes participated in collecting wild plant foods.

The men of the village would participate in a communal hunt on horseback if such large action was deemed advisable. If land was difficult to clear, several closely related households would assist one another in the work of clearing. Kinsmen, even when dwelling in different households, would assist each other in economic activities.

PRESENT-DAY ECONOMY OF THE TERENA

GENERAL DESCRIPTION

The migration of the Terena into their present location in Brazilian territory was followed by many changes in their economy. Here they found a new physical and social environment. Southern Mato Grosso was already under effective Brazilian control. Brazilian cattlemen were pushing westward, seeking land and labor for their new enterprises. The old free life of cultivation, hunting, fishing, and raiding came to an end—the Terena had to settle down. On the lands allotted to them, they began to cultivate plots of manioc, maize, sugarcane, cotton, and other crops
